         1.   bathrooms, busses, school, dorms...

p. 152

"Finkelhor et al. (1988) found that most daycare abuse occurs around toileting, suggesting that disabilities enhancing the need for toileting assistance may be associated with increased risk of sexual abuse. Sullivan, Vernon and Scanlan (1987) found that, in deaf youth, sexual abuse tended to occur in bathrooms, bedrooms and specialized transportation vehicles."

   1. **stu who are d/hh...**

      "The deaf youth stated that the sexual abuse tended to occur in vans or buses when going to and from school, in bathrooms and in beds. Most of the mainstreamed students were abused at home, however the residential children were more likely to be abused at school."

      "The authors have found that long regular bus rides where children are confined in a small area with little or no supervision represents a high risk situation for sexual (and other) abuse."
