

The Innocence Case

Strong Innocence (DOB: 8/15/04) is a 5-year-old white student at your elementary school. He and his mother, Hope Innocence, reside at 1501 East Trusting Way, Dream, Florida 12345. His student identification number (FSI) is 0600000000.

Strong and his mother recently moved to Dream, Florida. Hope is active in the school PTO and volunteers at your school. She and Strong don't have any family here in Dream, and have befriended the school staff and their neighbors.

Strong was observed by his teacher during recess to engage other students in a new game of hide and seek. While showing a female student what happens when she's found, Strong touches her crotch. After stopping Strong and returning to class, the teacher sends Strong to the child abuse designee.

The child abuse designee asks Strong where he learned the new hide and seek game. Strong responds by saying that Johnny (a 5th grade student at your school) and his 7-year-old sister, Beautiful (also a student at your school), taught him the game this summer. The designee asks what happens when someone is found. Strong says, "Johnny humps them or kisses their chest with their shirt up." In the midst of explaining how Johnny humps them, Strong shows you how Johnny touched his "Private" and made it hurt. Strong also tells you that sometimes Angel, Candy, and Apple play the game too. Strong says that he likes the game, but doesn't like when he gets found.

How many children need to be reported to the abuse hotline? Identify the children.
