

Wang, C-T., & Holton, J. (2007). Total estimated cost of child abuse and neglect in the United States. Retrieved on 2/3/2008 from: http://www.preventchildabuse.org/about_us/media_releases/pcaa_pew_economic_impact_study_final.pdf

- p. 1
 - “...each year in the United States, close to one million children are confirmed victims of child maltreatment.”
 - Impact of abuse or neglect...
 - “Poor physical health (e.g., chronic fatigue, altered immune function, hypertension, sexually transmitted diseases, obesity);
 - Poor emotional and mental health (e.g., depression, anxiety, eating disorders, suicidal thoughts and attempts, post-traumatic stress disorder);
 - Social difficulties (e.g., insecure attachments with caregivers, which may lead to difficulties in developing trusting relationships with peers and adults later in life);
 - Cognitive dysfunction (e.g., deficits in attention, abstract reasoning, language development, and problem-solving skills, which ultimately affect academic achievement and school performance);
 - High-risk health behaviors (e.g., a higher number of lifetime sexual partners, younger age at first voluntary intercourse, teen pregnancy, alcohol and substance abuse); and
 - Behavioral problems (e.g., aggression, juvenile delinquency, adult criminality, abusive or violent behavior) (Child Welfare Information Gateway, 2006; Goldman, Salus, Wolcott, & Kennedy, 2003; Hagele, 2005).”
- P. 2
 - “Based on data drawn from a variety of sources, the estimated annual cost of child abuse and neglect is \$103.8 billion in 2007 value.
